

Highway 35 Detour

Beginning in June, Highway 35 between Highway 243 and 2nd Avenue in Osceola will undergo construction. The \$1.3 million project includes reconstructing the roadway and replacing a culvert, retaining walls, storm sewer, sanitary sewer, and water main.

More than 12,000 vehicles use this roadway on a daily basis. During the project, Highway 35 traffic will be detoured using Highway 243, Minnesota Highway 95, and US Highway 8.

Traffic wishing to go to downtown Osceola can use the detour established by the village using County M and 3rd Avenue.

The detour routes were selected to minimize driver inconvenience and allow motorists a safe and efficient means to continue to frequent the businesses in Osceola throughout the construction.

Construction is scheduled through September 1, 2006.
